## Enhanced Income and Flexibility With GLB Riders

### Lifetime Income Plus Flex and Lifetime Income Plus Multiplier Flex

|  |   |
|--|---|
| <b>Enhanced Income Benefit (Confinement Rider)</b>                 | <p>Beginning on the second contract anniversary, clients have the opportunity to receive enhanced income of up to 200% of their MAWA on or after GLB rider activation. Clients must be confined to a qualified facility such as a nursing home for at least 90 days to be eligible for this benefit. The enhanced income will not be treated as an excess withdrawal and is available for up to five contract years or the depletion of the contract value, if sooner. The confinement rider is not long-term care insurance and is subject to other restrictions and limitations. Please see the contract and Owner's Acknowledgment and Disclosure Statement for details.</p> |
| <b>Flexibility to Take Income Without Impacting Key Guarantees</b> | <p>Withdrawals taken prior to activation will NOT:</p> <ul style="list-style-type: none"> <li>• Void the 10% Income Credit Rate (Lifetime Income Plus Flex)</li> <li>• Eliminate the Double (x2) feature (Lifetime Income Plus Multiplier Flex)</li> <li>• Lock in the MAWA for life</li> </ul> <p>Please note the Income Base and Income Credit Base are reduced in the same proportion by which the withdrawal reduces the contract value</p>   |
| <b>Flexibility to Change Coverage After Contract Issue</b>         | <p>Single or joint life coverage is elected at contract issue. However, changes may be made at the time of activation or under certain situations prior to activation, such as marriage, divorce or death of a spouse. No changes are allowed after activation. Other limitations and restrictions apply.</p>   |

## Indices

### Equity Market Indices

### Multi-Asset, Risk-Managed Indices

Note: Index annuities are not a direct investment in the stock market.  
The Russell 2000® and S&P 500® are price return indices and do not include dividends.

Both the AB All Market Index® and the ML Strategic Balanced Index® embed an annual index cost in the calculations of the change in index value. This embedded index cost will reduce any change in index value, and it funds certain operational and licensing costs. Since it will affect the returns of the indices, it may also impact the amount of interest credited to the index annuity; however, it is not a fee paid by the policy owner or received by the issuing insurance company.

Note: The index rate caps, spreads and participation rates are set for each index term (1 year or 2 years) by American General Life Insurance Company. For each 2-Year Point-to-Point index interest account subject to a spread, the total spread is the annualized spread multiplied by two. The participation rate is set at 100% for the index interest accounts subject to an index rate cap or spread only and is guaranteed for the life of the contract. The Participation Rate index interest accounts will be subject to a participation rate, which ranges from 5% to 100% and is subject to change. The Participation (PAR) Rate for the PAR Rate with Spread accounts may be below or above 100%. The composition and risk-controlled nature of the ML Strategic Balanced Index® may dampen the upside potential of the Index's performance. For all accounts, the interest credited rate will never be less than zero percent. For Power Select Plus Income, the index rate caps and spreads for all accounts, the participation rates for the index accounts subject to a fluctuating participation rate and the interest rate for the 1-year fixed interest account may vary based on the guaranteed living benefit rider elected. Index interest accounts may not be available in all states.

Note: This product guide is not intended to be all-inclusive. State and firm variations may apply. See page 8 for Key Terms and Definitions. Please also refer to the Owner Acknowledgment and Disclosure Statement for more information.

## Important Information about Selling Index Annuity Products

Index annuity products are fixed deferred annuities, and it's important that producers properly position these products when selling them to clients. Index annuities are not subject to federal and state securities registration requirements, so it's important to understand that the way in which a product is marketed can directly impact the determination of whether it is considered to be a security. Therefore, all producers should be aware of the following guidelines for marketing index annuity products:

- Index annuity products should be properly positioned as fixed deferred annuities and not as any other kind of product.
- They should not be marketed as being equivalent to, or as a substitute for, equity investments (such as mutual funds, securities, an investment in the market, etc.).
- The marketing and sales process should speak to the guaranteed features of the product without unduly emphasizing the possibility of index interest crediting or implying any linkage to equities.
- The overall focus of any marketing, including any sales presentations, should be the long-term retirement aspects of index annuities, such as minimum guaranteed surrender values, annuity payout options and the safety and stability of insurance products in general.

## Key Terms and Definitions

**AB All Market Index®:** An adaptive, dynamically allocated index with access to 20 global growth and global defensive markets.

**Excess Withdrawal:** Any withdrawal in excess of the Maximum Annual Withdrawal Amount.

**Enhanced Income Benefit (Confinement Rider):** A feature that is automatically included with Lifetime Income Plus Flex and Lifetime Income Plus Multiplier Flex for no additional fee. It provides enhanced income if the client is confined to a qualified facility such as a nursing home.

**GLB Rider Activation:** The decision to activate or turn on the rider's stream of guaranteed lifetime income. Clients must notify us in writing to begin taking lifetime withdrawals.

**Income Base:** The value on which guaranteed withdrawals and the rider fee are based; it is not used in the calculation of the contract value or any other benefits under the contract, and cannot be withdrawn partially or in a lump sum.

**Income Credit:** The amount that may be added to the Income Base on contract anniversaries.

**Income Credit Base:** A component of the rider that is used to calculate the annual income credit.

**Index Rate Cap:** The maximum amount of interest that can be credited to an index interest account over an index term.

**Maximum Annual Withdrawal Amount:** The maximum amount of income that can be taken each year once the rider has been activated without reducing the Income Base and Income Credit Base.

**ML Strategic Balanced Index®:** A hybrid index that seeks growth and risk management by actively allocating to equities, fixed income and cash. Allocations between equities and fixed income are rebalanced semiannually, while cash positions are adjusted on a daily basis to help manage risk.

**Participation Rate:** The percentage of the positive movement of an index that is used to calculate the interest earned in the contract.

**PIMCO Global Optima Index®:** A quantitative, rules-based index that seeks to provide upside return potential by dynamically adjusting its allocations to a diverse range of global equity and U.S. fixed income markets.

**Premium Enhancement:** Amount that may be added to the contract (also known as a bonus).

**Premium Enhancement Recapture:** Premium enhancements are subject to an 8-year recapture schedule. A portion of the premium enhancement will be recaptured on a pro-rata basis if the contract is annuitized or surrendered, or if withdrawals exceed the 5% Free Withdrawal Amount taken prior to the end of the 8th contract year. Pro-rata means the premium enhancement will be reduced by the same percentage that the withdrawal in excess of the Free Withdrawal Amount reduced the contract value.

**Russell 2000®:** An equity index that tracks the performance of U.S. small-cap stocks with market capitalizations that average

**S&P 500®:** An equity index that tracks the performance of 500 of the largest companies in the U.S. It is widely regarded as the standard for measuring the performance of the U.S. stock market.

**Spread:** Minimum percentage or threshold that the index's performance must exceed to be credited interest.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be suitable or appropriate for all clients.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if clients make withdrawals or surrender their annuity before age 59½. Clients should consult a tax advisor regarding their specific situation.

**The ML Strategic Balanced Index**® embeds an annual index cost in the calculations of the change in index value over the index term. This “embedded index cost” will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest, and it funds certain operational and licensing costs for the index. It is not a fee paid by clients or received by American General Life Insurance Company (“AGL”). AGL’s licensing relationship with Merrill Lynch, Pierce, Fenner & Smith Incorporated for use of the ML Strategic Balanced Index® and for use of certain service marks includes AGL’s purchase of financial instruments for purposes of meeting its interest crediting obligations.
